

E3 SERIES

SPEAKERS

E3c

LCR/CENTER CHANNEL SPEAKER

The center channel has a very important job; it must accurately reproduce on screen dialogue and effects clearly and with enough power to keep pace with the rest of the system. Unlike most competing Home-Theater-In-a-Box (HTIB) center channels, the E3c compact center speaker makes easy work of this vital task.

(273mm W x 108mm H x 152mm D)

WEIGHT:

5.90 lbs. (2.68 kg.)

WARRANTY:

5 Years*

Despite its smaller size, the E3c supplies your home theater with clear, concise dialogue, and bone-chilling, realistic effects. Dual 3-inch aluminized polygraphite woofers and a 3/4-inch nano-silk dome tweeter work in concert together to give the E3c its near full-range performance and high power handling. The combination of polygraphite with our specialized aluminum coating adds strength and stiffens the woofers to prevent their cones from flexing under higher demands. This unique process, exclusive to RBH, is also found in our larger, award-winning speakers. The 3/4-inch nano-silk tweeter faithfully brings out the brilliance in any movie soundtrack or song, and its timbre and voice are matched to the E3b mini-bookshelf speakers. The E3c's are available in either a white or black finish.

The E3c compact center channel speaker is perhaps the most crucial element of the Cinema 5 and Cinema 7 compact home theater systems, as pictured above.
